

David Parker

Software Developer

In a short period of time my desire to be an asset to the brand led me to go from being an unpaid intern to a major leader in our studio, accompanying the design team to Paris for fashion week. I developed 100s of patterns from shirts to jackets to hats based on abstract concepts or ready made vintage garments.

Skills

- HTML 5
- CSS 3
- Javascript
- C#
- VUE
- Bootstrap
- Scrum
- MVC

Applications

Lender

A lending app for outdoor recreation equipment developed in a four person team. The app allows for users to list items to lend, browse other users listings based on category or by location using Google Maps, communicate with each other to establish terms for lending and leave reviews. Built with Vue front-end, Node.js back-end.

KanBan

A kanban task manager based for personal use. The app was created with a fellow developer. KanBan utilizes Vue front-end, Node.js back-end.
